CHANGE TO SPRING LOADED FAUCET HANDLES

Dallas, Texas, February 8, 2017 - Mountain Plumbing Products is announcing a design change resulting in the removal of the Spring-Loaded cartridge, marketed as "Self-Closing", on the hot water side of the following faucets:

MT1100	MT1101
MT1400	MT1401
MT1500	MT1501

This change is being made effective immediately out of an abundance of caution relating to the design and potential patent infringement of these cartridges. Mountain Plumbing Products takes the designs of its products very seriously and rejects any claims of patent infringement and is working on a resolution with our cartridge suppliers.

This change is in no way related to the function or quality of the faucets or cartridges. All currently inventoried faucets as well as all faucets previously sold are not affected by this announcement. Mountain Plumbing Products remains committed to providing the highest quality point-of-use and instant hot water systems available on the market.
